

Diversity in the marine sciences

Prof. Kimberley Peters, Helmholtz Institute for Functional Marine
Biodiversity at the University of Oldenburg (HIFMB)

Thursday, May 16, 2024, 1 - 2 pm

Lunch Time Lecture (Language: English)

Online: <https://meeting.uol.de/b/jan-k1b-7vt-w5t>

ABSTRACT

In this session, several key developments around equality, diversity and inclusion in the marine sciences specifically will be highlighted: from job recruiting, to research, to the classroom. Whilst there are general topics that transcend disciplinary boundaries and that matter across the landscape of higher education and the university sector, others are more specific and based on context. What difference does working with the ocean, or at sea, make and also in different oceans and coastal regions globally? More so, how does it also matter in the lecture hall when it comes teaching about the (world) oceans, past and present? This session reflects upon the seascape of diversity in marine science and considerations that might be useful in this field.

This lecture is part of the lecture and workshop series:

Gender & Diversity in STEM and Medicine

hosted by equal opportunities officers of Faculty V and VI
