

Dear sustainability enthusiasts,

Welcome to the 9th issue of the newsletter that we publish as part of the climate protection project. Here we report at more or less regular intervals on the progress of the project and on news from the sustainability cosmos of the university. Please feel free to recommend it to others.

If you have recently joined us here (yay!), you can check out the back issues on the [website](#).

Final spurt

Next week it's finally time for us to present the final climate protection concept to the Senate - in the university public part, of course, so you can be there if you like. The meeting will take place on Wednesday, 09 November from 9am in the Senate meeting room.

I've been told that we'll get to it around 12 noon. You can already view the document at Senate Documents on the intranet, [this way](#).

Climate education for all

As if we had agreed, the Public Climate School will also be held next week. The goal of the Public Climate School is to make climate education easily accessible to all, bringing it to the mainstream of society. The local chapter of Students for future, with the participation of the university, has put together a varied local program that you should definitely check out. You can find the program [here](#).

HochNiNa hires

In the Network Sustainability of Universities in Lower Saxony (HochNiNa) (= people with jobs like mine at other universities) we are currently looking for a coordinator for a project on greenhouse gas accounting. More precisely, a cross-university standard for greenhouse gas accounting is to be developed for universities in Lower Saxony. The position will be located here at the University of Oldenburg at COAST. If you know someone who knows someone who knows someone, we would be happy if you share the announcement. Or apply yourself right away. More information is available [here](#).

That's it for this little newsletter issue.

It would be great if you could forward this newsletter to your colleagues or recommend them to sign up. As you know, reach is everything.

Thank you very much & best regards,

Anna Krämer [she/her]

Climate Protection Manager
COAST - Centre for Environment and Sustainability
Carl von Ossietzky University Oldenburg
Ammerländer Heerstr. 114-118
26129 Oldenburg
